MAIN STREET PAINT KIT

Thank you so much for your purchase! We are constantly working hard to create a seamless and fun experience for our clients and pray that this paint kit will bless you.

This kit includes:

- ❖ One 4 layered wood canvas of Main Street, Emmett
- ❖ Three paintbrushes (small, medium and large)
- ❖ Paint in these shades with the corresponding number labels:
  - White (1), Black (2), Light Rust (3), Rust (4), Red (5), Light Yellow (6), Mustard Yellow (7), Lime Green (8), Dark Green (9), Teal (10), Sky Blue (11), Navy (12), Shadow Blue (13), Dark Brown (14), Light Brown (15), Light Grey (16)
  - Please note that I make a lot of these colors, so they may need to be premixed
- ❖ Printed step-by-step directions with photo reference (attached to this paper)
- ❖ Glue to complete your masterpiece
- ❖ Two Command strips to hang your finished product without damaging your walls

We recommend that you *use your kit within 30 days of purchase* to ensure your paint is at its peak quality.

We are a newer company and quality is something we value for our clients. If you have any suggests, we would love your feedback! Please reach out to us at info@cinkodesigns.com

Thank you, again, for your support!

Matthew & Amara Cinko

First, paint the solid base layer with Sky Blue (11)	Add wind blown clouds with white (1) in sweeping motion
Add "fluff" by dabbing your paintbrush along hard white lines and blending white and blue	Add a base of white (1) to the first layer storefront windows
Paint the first shop Dark Green (9), leaving a space for the yellow detailing	Paint the second shop Rust (4)

Add Mustard Yellow (7) to windows and poles

Add Light Yellow (6) to one owning

Add Light Rust (3) to the side of the building

Add Sky Blue (11) to windows (I missed the top windows of the red store, see next step photo)

Add Dark Brown (14) to the first storefront and around the windows of the second storefront, as well as little 'c's on top of the red storefront.

Dab White (1) to Antique Sign. You can see that I also added Dark Brown (14) brickwork to this area by dabbing in little random patterns.

Paint sidewalk Grey (16)

Finish this layer with Black (2) details in windows, doorway, and owning

Start the second layer with a base of White (1)
Paint first storefront Rust (4)

Paint second storefront Mustard Yellow (7)
Paint the side of the storefront and ownings Light Yellow (6)

Add Sky Blue (11) to storefront window

Add a little Mustard yellow (7) to storefront window

Add Red (5) and White (1) to window and Pepsi sign

Use water to blend colors together

Add watered down Black (2) to storefront window

Add Navy (12) to Pepsi sign

|	
Paint last storefront Dark Brown (14) and add brick details to yellow storefront	Add Teal (10) lines to ownings and bottom of the first storefront you painted Rust
Paint the sidewalk Light Grey (16)	Add shadowing to the sidewalk with Shadow Blue (13)
Paint the street, bike rail, and street sign Black (2). Then glue first three painted layers together. Leave off the top stained piece for after the completion of the trees	(I glued the top layer on early – Please wait until you're done painting to add the final layer) Add sidewalk brick with Light Rust (3) – use a little amout and let the shadows shine through the brick color. Also, add the diamond shape for the tree base in light rust.
|	
Using Light Brown (15), paint tree trunks (x3) and add dirt to the brick daimond from the last shape	Add Dark Brown (14) to the right side of your tree trunks, branches and a little bit into the dirt under the trees
Add Dark Green (9) leaves using dabbing versus brushing	Do the same with Lime Green (8). Don't completely fill in over the Dark Green
Add Mustard Yellow (7) to the left side of the tree leaves. Again, don't fill in the entire space, leave some color showing through	Add White (1) to the left and top of the tree leaves, using even more scarcity in this area
Add Black (2) to the right and center bottom of your tree leaves
Keep dabbing while the paint is wet to blend the colors together to your liking!
